◆ AUCTION STRATEGY CHEAT SHEET

- STARS & SCRUBS (Joe's default)**
- Spend \$160+ on 3-4 elite players
 - Fill bench with \$1-\$3 dart throws
 - Accept mid-tier weakness · star power wins weeks

- BALANCED**
- Spread \$ evenly · \$18-\$30 across starters
 - No glaring weak spot, no superstar anchor

- VALUE HUNTER**
- Only bid when MAX BID > high bid + \$3
 - Wait out tier-1 runs, pounce on bargains

- ZERO-RB (AUCTION FLAVOR)**
- Skip \$40+ RBs · dump \$ into WR/TE/QB
 - Build depth at RB late · flex lottery tickets
 - Handcuff everything under \$3

! AUCTION MISTAKES TO AVOID

- ✗ Chasing past MAX BID on "just one more dollar"
This is how \$200 budgets die. Trust the cap.
- ✗ Nominating your own top target first
Burns other teams' \$ on your player. Nominate theirs.
- ✗ Sitting at \$180 with 7 slots still open
Pace calculator turns red · spend before auction locks
- ✗ Ignoring inflation %
+6% on top tier means \$56 Bijan is really \$59
- ✗ All elite RBs, zero WRs — stars unbalanced
Check My Squad slot map before every bid
- ✗ Running full research 10 mins before draft
Day before. Day-of = quick refresh only.

◆ JOE'S PERSONAL \$ RULES

- HARD CAPS (FROM PRE-DRAFT)**
- Never pay over \$60 for any RB
 - No QB before \$8 spent at position
 - No TE over \$15 (Kelce / McBride only)
 - Kicker + DST = \$1 each, late

- PACE TARGETS (\$200)**
- After 6 picks: \$60-\$80 spent
 - After 10 picks: \$140-\$160 spent
 - Last 6 slots: \$40-\$60 total

- BENCH POLICY**
- 2 x handcuff RBs (\$2-\$5 each)
 - 1 x upside WR dart (\$3-\$6)
