HOW TO DECIDE · SNAKE MATH

- STEAL tag + last in tier → snap it, no hesitation
- Snake turn: will target survive to your next pick?
- Keeper fills slot X → pivot rec away from that position
- Hero-RB = R1 RB, then WR/WR/WR (Tyler's default)

7

READ THE ROOM — SNAKE

Tier cliffs · runs on positions · keeper-aware pivots

! TIER CLIFF WARNING

"2 RB1s left before drop-off. Your snake turn has 11 picks between. You will NOT see them on the way back."

◆ POSITION RUN DETECTED

"WR run — 4 of last 5 picks. Don't chase the run. Grab the value RB others are skipping. Zag when they zig."

◆ KEEPER-AWARE PIVOT

"You kept Kelce (TE) in R6 + Jefferson (WR) in R1 — positions filled. Don't spend R3 on another TE/WR1."

SNAKE PIVOTS TO WATCH

- Hero-RB stalled? → switch to Zero-RB with WR depth
- All tier cliffs fell? → chase upside · ignore ADP
- Keepers shifted rounds? → AI auto-re-weights targets

• Key: tier cliff > ADP value · last in tier always wins

8

WRAP + REVIEW

Draft done → slide-down → Post-Draft

YOUR GRADE

B+

ADP value +8.4 · 87th %ile

SNAKE-SPECIFIC VIEWS

- ◆ ADP delta per pick
STEAL / REACH / FAIR tags
- ◆ Tier Cliff Map (who got cut)
where tiers ran dry first
- ◆ Keeper ROI breakdown

THINGS TO DO

- ☞ Read the narrative for each pick (ADP math)
- ☞ Export per-team reports for all 10-12 teams
- ☞ Flag next year's keeper candidates NOW
- ☞ Save the run — informs mid-season pivots

◆ ROAST REPORT — SNAKE EDITION

◆ SNAKE UI GLOSSARY

- 3.7 Snake position — Round 3, Pick 7 overall
- ADP Average Draft Position — baseline expectation
- +5 ADP delta — STEAL (got him 5 picks late)
- 3 ADP delta — REACH (drafted 3 picks early)
- K Keeper flag — player locked to a round slot
- ! Tier cliff — last player before big drop-off
- ★ AI recommendation — confidence-weighted
- ? "Why?" — on-demand reasoning for any pick
- Green dot · sheet polling is LIVE
- Red dot · polling paused or sheet not updating

TAP "WHY?" ANY TIME FOR FULL REASONING

◆ SNAKE STRATEGY CHEAT SHEET

- HERO-RB (Tyler's default)**
- R1 elite RB anchor, then WR/WR/WR
 - RB2/3 from tier 3+ value later
 - Build positional depth before reaching back for RB
- ZERO-RB**
- Skip RB R1-R4 · load WR/TE elite
 - Flood R5-R10 with RB upside + handcuffs
- ROBUST-RB**
- RB/RB R1-R2 · corner the position
 - Crush waivers later with depth
- TIER-BASED**
- Ignore ADP · take the last in every tier
 - Works best with AI cliff warnings on
 - Highest correlation with championship odds

! SNAKE MISTAKES TO AVOID

- ✗ Reaching on your keeper's position
You already have him. Build around, don't duplicate.
- ✗ Chasing the position run
4 WRs gone in a row = GRAB THE RB others are skipping
- ✗ Ignoring tier cliffs
"Last in tier" always beats "best ADP value"
- ✗ Forgetting snake-turn math
Your next 2 picks are close · stagger targets
- ✗ Picking a K or DST before R14
Wait to the very end · they're all replaceable
- ✗ Running full research 10 mins before draft
Day before. Day-of = quick refresh only.

◆ TYLER'S KEEPER RULES

- KEEPER AWARENESS**
- Keep a player = skip that round's pick
 - Cost round advances 1 per year held
 - Value threshold: $ADP \leq \text{cost round} - 2$
- ROUND DISCIPLINE**
- No QB before R5
 - No TE before R7 (unless Kelce/McBride kept)
 - K / DST = R14+ only
- BENCH POLICY**
- 2 x RB handcuffs to keeper RBs
 - 1 x next-year keeper candidate
 - Flex lottery tickets over veterans

Adjust per keeper slate

♡ AFTER DRAFT DAY — IN-SEASON + NEXT YEAR KEEPERS

- Saved Run tracks ADP delta all season — informs trades + waiver bids
- Next year: AI flags best keeper value come October
