◆ WHAT YOU'VE PRODUCED — AUCTION OUTPUT

1. \$ Draft Board — every player priced for YOUR \$200 league + scoring

2. Budget Allocation — planned \$ split across QB/RB/WR/TE/FLEX tiers

3. Nomination List — strategic "throw-ins" to drain opponent budgets

4. Hard-Cap List — prices you will NOT exceed (from your rules)

5. Target List — "must haves" with max \$ per name

6. Saved Run — compare valuations before draft night

◆ DAY-BEFORE CHECKLIST (JOE)

☐ Re-run "Optimize Your Edge" (injury shifts \$)

☐ Confirm \$200 budget + roster size in ESPN

☐ Check nomination order if known

☐ Charge phone · strong wifi · app open 15 min early

★ WHEN TO CALL THE LLM (AUCTION CONTEXT) ★

Each call costs money and time — know which action triggers one.

◆ CALL THE LLM WHEN...

✓ You configure the ESPN auction league (once)

✓ Day before — \$ values refresh on latest news

✓ It's YOUR nomination / bid turn — 3 AI targets + max \$

✓ You tap "Why?" on a recommendation — \$ justification

✓ Mid-auction pivot — "Stars & Scrubs blown up, switch?"

✓ Adding auction rules ("never pay over \$60 RB")

✓ Final post-draft — auction grade, \$ efficiency score, roast

! DON'T CALL THE LLM WHEN...

X Browsing the \$ Draft Board — cached, no call

X Filtering by position — local filter only

X Expanding a player card for \$ reasoning — cached

X Reviewing a saved Run — replay, no new call

X Re-running research multiple times "just in case"

X Watching others bid — wait until it's your turn

X Setting changes — only re-runs trigger new valuations
